

# XB40

## pasquali

The **XB40 two-wheel tractor** has a gearbox with 3 forward and 3 reverse speeds and a quick reverser to change the direction of travel, this enables operations to be performed with a broad range of ratios adapting to the different types of use. The differential with lock comes as standard fitting.

The driving columns are adjustable and reversible in order to use front and rear equipment. The drum brakes are controlled separately on the two wheels.

This tractor has been specifically designed to optimise the quality/price ratio. Versatility is still the primary feature of this **XB40** version.

Engine	Power (kw/hp)	Fuel	Start	Gearbox	Speed	Reverse gear	Brakes	Differential
Honda GX390	8,2 / 11,2	Petrol	Recoil or electric starter	3 + 3	I - 1,26 II - 2,92 III - 4,30 IRM - 1,33 IIRM - 3,08 IIIRM - 4,53	Yes	Yes	with lock
